(Status for now) ➡️

- Scoring for E2a data flow,

- Progress on data quality.

Data deliveries and feedback for 2016 (B-G)

Data delivery status: B-G data flows for 2016.

European Environment Agency

Data deliveries and feedback for 2016 (B-G)

**Data delivery timeline for B-G data flows, 2016.**

Data deliveries and feedback for data flow B, 2016.

The feedback is based both on QA checks running in CDR and additional checks performed outside CDR (geometry validation).

Map Overview

Nr of Countries w/ Data for (E1a - 673) Time series in 2016:	40
Technically Accepted for (E1a - 673) Time series in 2016:	31
Correction Requests for (E1a - 673) Time series in 2016:	1
Final Feedback for (E1a - 673) Time series in 2016:	8

Similar as for data flow B, the feedback is based both on QA checks running in CDR and additional checks performed outside CDR (import into SQL DB, aggregations).

Due to amount of data, complexity of checks and allowed partial resubmissions, process is more difficult to follow than in case of B data flow.

Data deliveries and feedback for data flow G, 2016.

Map Overview

Data Status
- Final Feedback
- Correction Requested
- Technically Accepted

|	
Nr of Countries w/ Data for (H - 680) Plans in 2016:	16
Technically Accepted for (H - 680) Plans in 2016:	14
Correction Requests for (H - 680) Plans in 2016:	
Final Feedback for (H - 680) Plans in 2016:	2

© OpenStreetMap contributors

Automated final feedback (acceptance/correction request) based on QA results.

QA rules were not fully implemented at the time of data collection. EEA/ETC-ACM has been rerunning the QA and will come back with related feedback to the Member States in order to clean the data before the next (2016) deliveries.
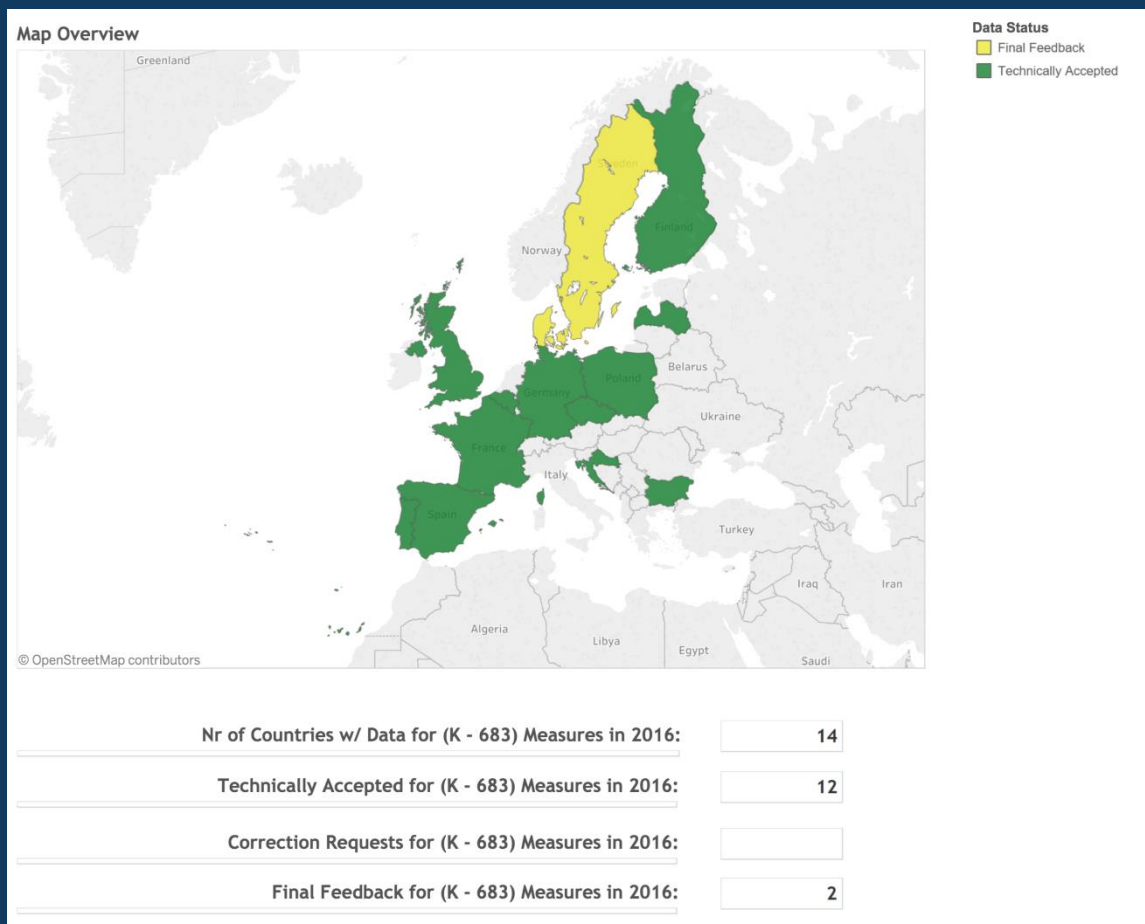

European Environment Agency

# Data deliveries and feedback for data flow I, 2015.

Automated final feedback (acceptance/correction request) based on QA results.

QA rules were not fully implemented at the time of data collection. EEA/ETC-ACM has been rerunning the QA and will come back with related feedback to the Member States in order to clean the data before the next (2016) deliveries.

European Environment Agency

Data deliveries and feedback for data flow J, 2015.

Map Overview

Data Status
- Final Feedback
- Technically Accepted

© OpenStreetMap contributors

Nr of Countries w/ Data for (J - 682) Scenarios in 2016:	13
Technically Accepted for (J - 682) Scenarios in 2016:	11
Correction Requests for (J - 682) Scenarios in 2016:	
Final Feedback for (J - 682) Scenarios in 2016:	2

Automated final feedback (acceptance/correction request) based on QA results.

QA rules were not fully implemented at the time of data collection. EEA/ETC-ACM has been rerunning the QA and will come back with related feedback to the Member States in order to clean the data before the next (2016) deliveries.

European Environment Agency

Data deliveries and feedback for data flow K, 2015.

Map Overview

Data Status
- Final Feedback
- Technically Accepted

Nr of Countries w/ Data for (K - 683) Measures in 2016:	14
Technically Accepted for (K - 683) Measures in 2016:	12
Correction Requests for (K - 683) Measures in 2016:	
Final Feedback for (K - 683) Measures in 2016:	2

Automated final feedback (acceptance/correction request) based on QA results.

QA rules were not fully implemented at the time of data collection. EEA/ETC-ACM has been rerunning the QA and will come back with related feedback to the Member States in order to clean the data before the next (2016) deliveries.

Data deliveries and feedback for 2018 (preliminary).

Data delivery status: preliminary (B,C) data flows for 2018.

European Environment Agency

Data deliveries and feedback for 2018 (preliminary).
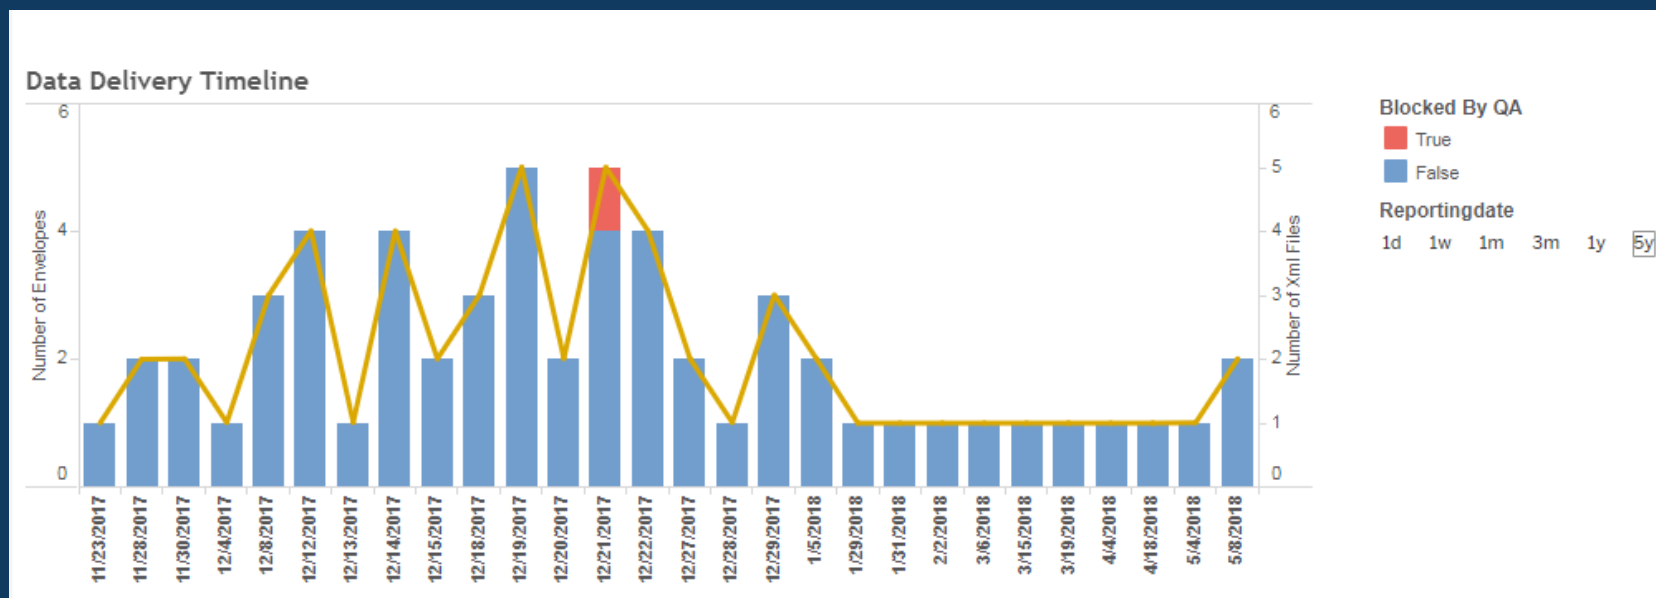

**Data delivery timeline for preliminary (B,C) data, 2018.**
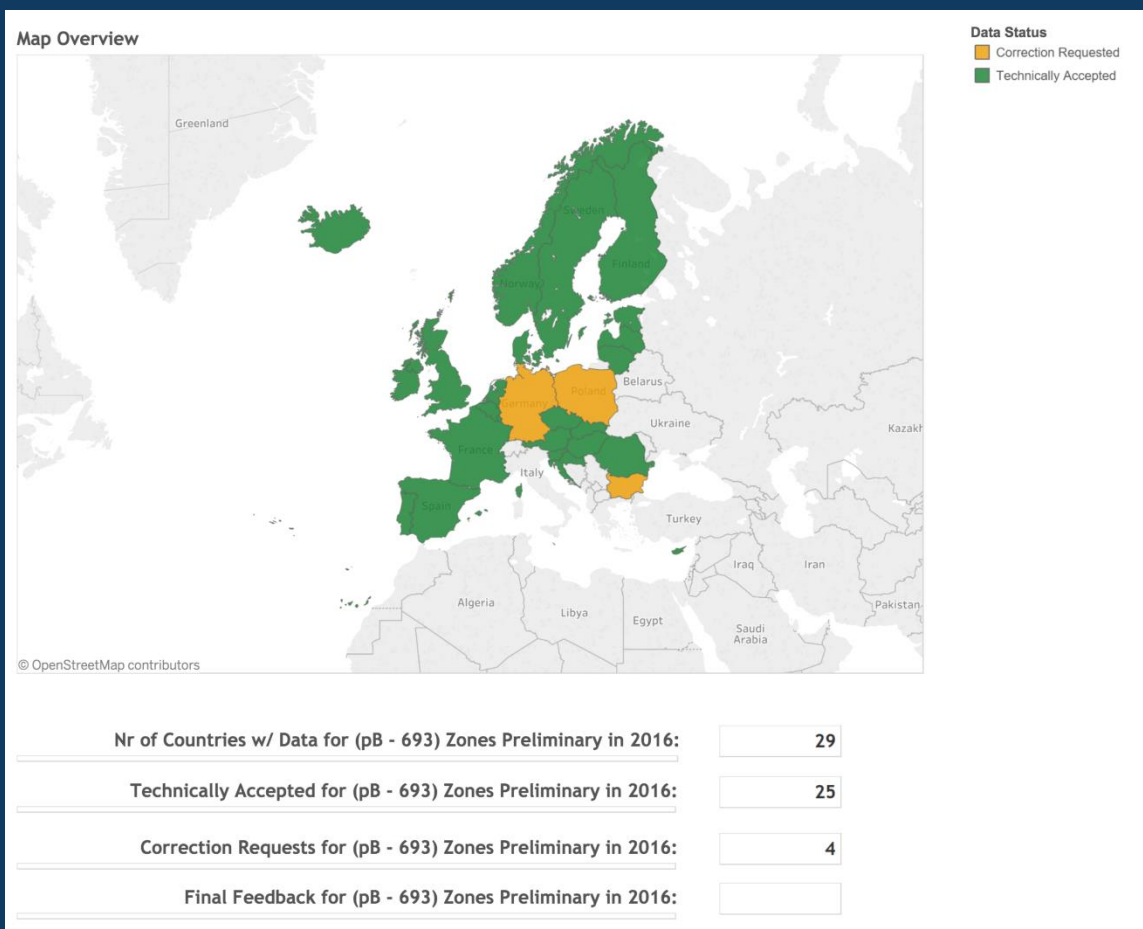

European Environment Agency

Data deliveries and feedback for preliminary B, 2018.

Map Overview

Data Status
- Correction Requested
- Technically Accepted

The feedback is based both on QA checks running in CDR and additional checks performed outside CDR (geometry validation).

Scoring of E2a data flow

Overview for data flow: AQ IPR/E2a: Information on primary up-to-date assessment data
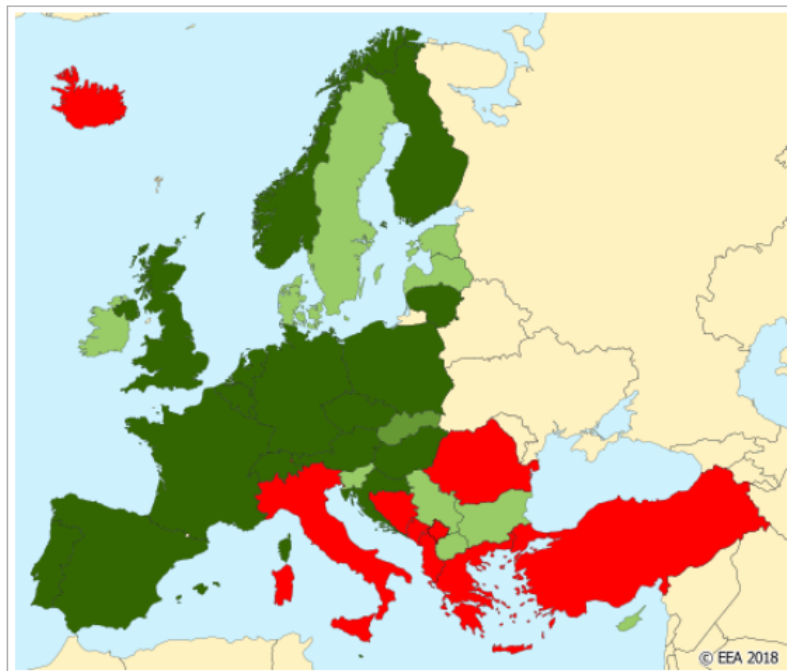

Legend:
- 18 countries with a score of 4: Austria, Belgium, Croatia, Czech Republic, Finland, France, Germany, Hungary, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Spain, Switzerland, United Kingdom
- 1 country with a score of 3: Slovakia
- 10 countries with a score of 2: Bulgaria, Cyprus, Denmark, Estonia, Former Yugoslav Republic of Macedonia, Ireland, Latvia, Serbia, Slovenia, Sweden
- No country in this category
- 10 countries with a score of 0: Albania, Bosnia and Herzegovina, Greece, Iceland, Italy, Kosovo under the UNSCR 1244/99, Liechtenstein, Montenegro, Romania, Turkey
- No country in this category

Data flow E2a: scoring status for 2017.

Daily follow up on average data delivery time (measurement → EEA's data base).
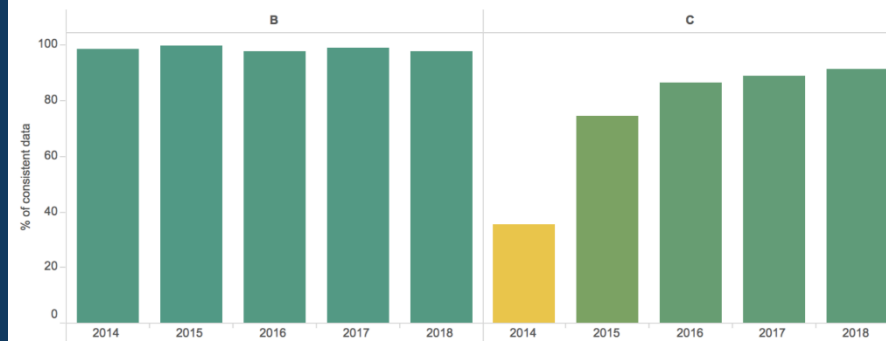

European Environment Agency
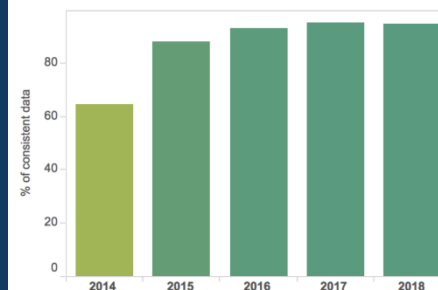

Progress on data quality

Average % of consistent data by country, year & data set
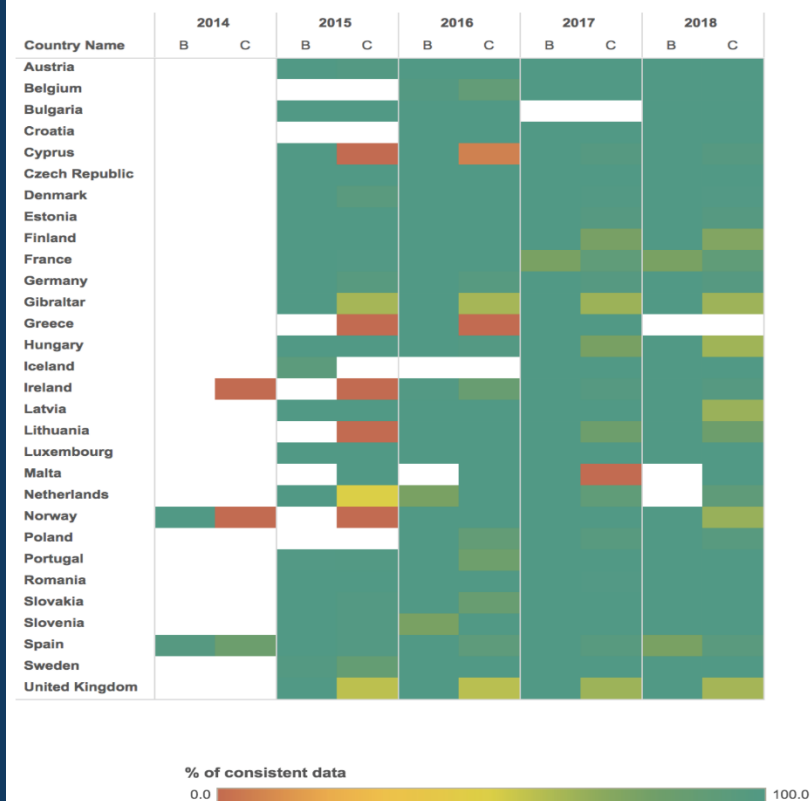

Average % of consistent data by year & data set (B, C & G)
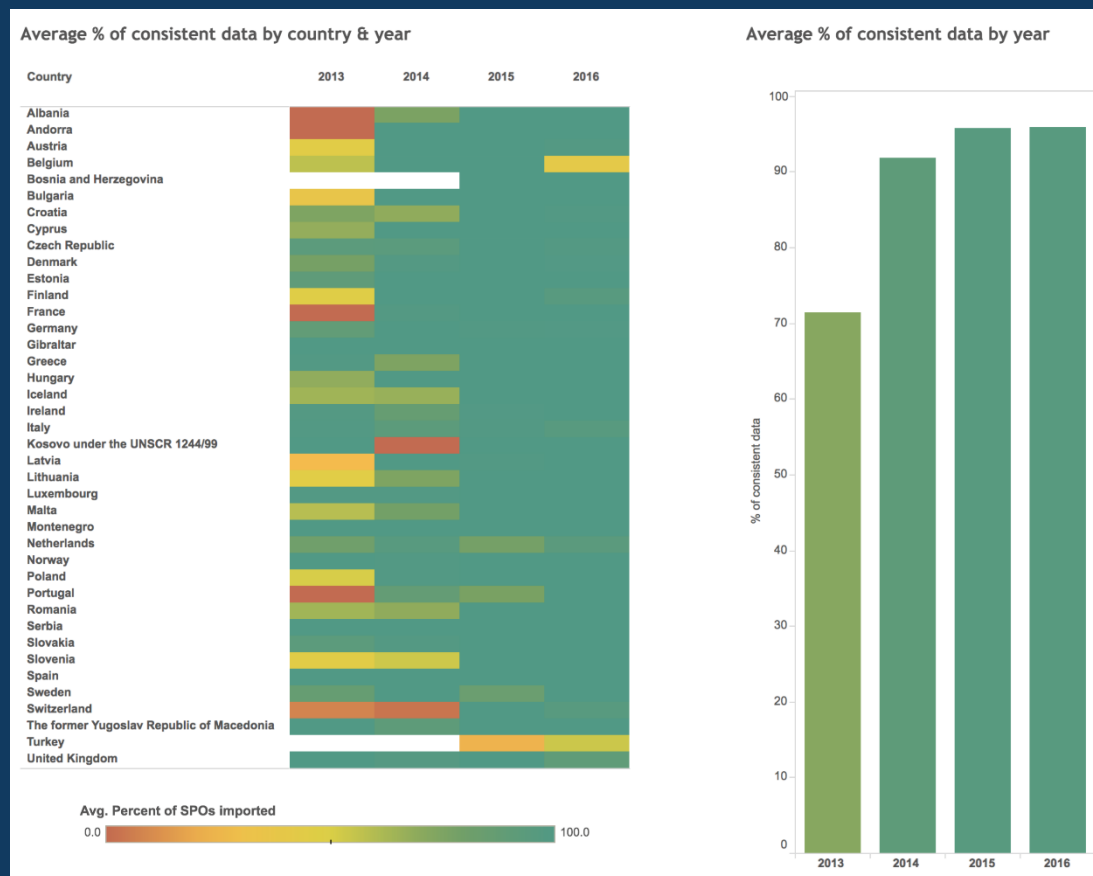

Average % of consistent by year

Average % of consistent by data set (B, C & G)

Import of data sets B, C & G into data bases using the same constraints on interlinkages – notice improvement towards the latest year.

Progress on data quality

Import of data sets B & C preliminary into data bases using the same constraints on interlinkages – notice improvement towards the latest year.

European Environment Agency

Progress on data quality

Import of data set E1a into data bases using the same constraints on interlinkages – notice improvement towards the latest year.

Thank you for your work!

European Environment Agency

Further actions 2017: H-K

Data processing (monitoring, QA) is not well adapted yet to follow the H-K deliveries where same year submissions occur in many envelopes.

We recommend uploading H-K reports in one envelope/country.

European Environment Agency
