Aims of this webinar

- > Present the latest version of the eSPIRS data model
- > Discuss the feedback received from the countries
- > Introduce INSPIRE identifiers and links with EURegistry
- Collect additional feedback
- Next steps

Background

- > Seveso Directive reporting requirements
 - > Establishment information
 - Major accident information
- New CID New reporting framework
 - > JRC stops hosting by end of 2025
 - > EEA starts hosting from 2026

Process

Progress

-) In 2023
 - > Analysis of CIDs
 - > Analysis existing JRC eSPIRS and eMARS platforms
 - > Initial drafting of data model specifications
-) In 2024
 - > First draft of eSPIRS data model
 - > Feedback on data model from the Community of practice

eSPIRS data model – Feedback from Countries

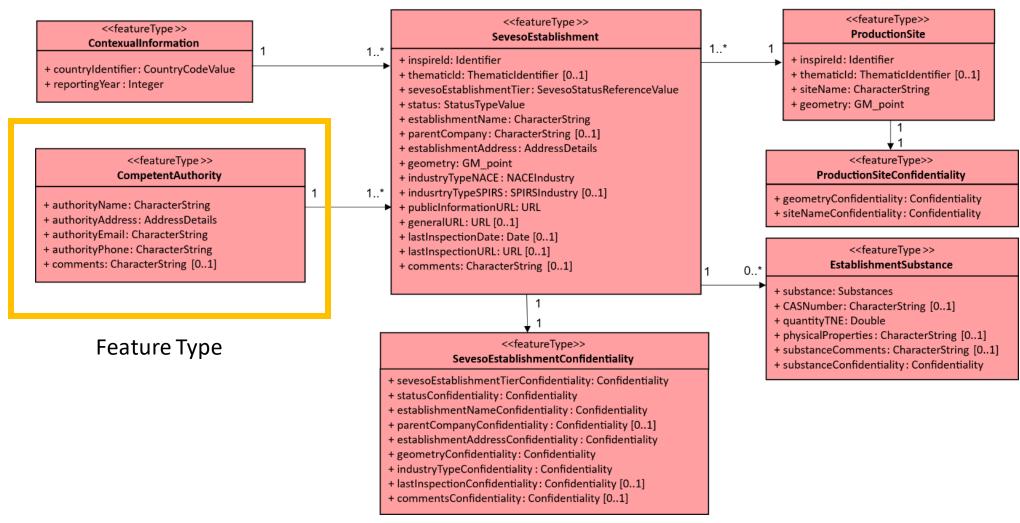

- > Comments from eight countries
 - > Two bilateral meetings
 - Six provided written feedback
- Most commented feature: Sites
- Many comments not directly related to the data model
 - > File format for reporting
 - > Reporting procedures
 - > Establishment lifecycle
 - > Links to other reporting obligations

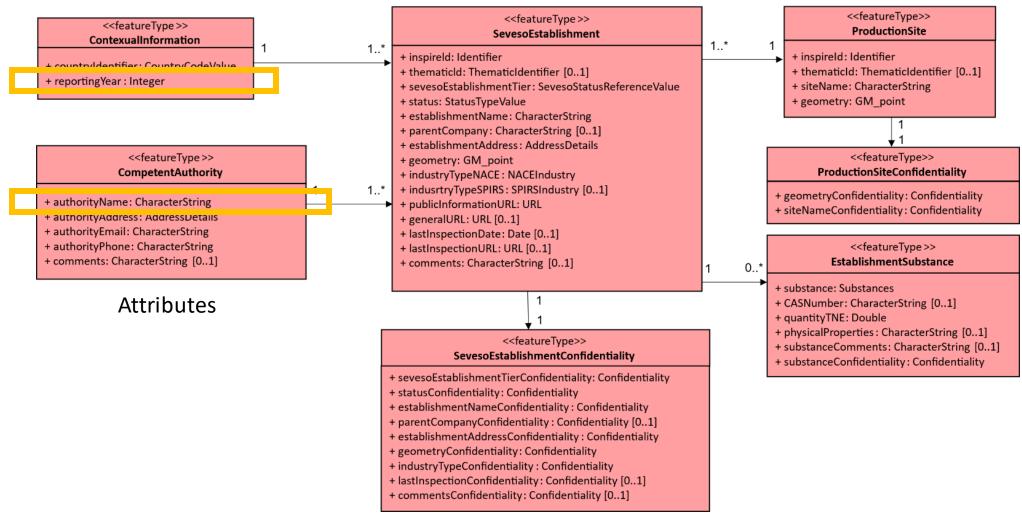

eSPIRS Data Model

- > Based on CIDs, Seveso directive, existing platforms
- > Useful to :
 - identify data gaps
 - o establish the type of each data element
 - o define the relationship between different data elements
- > File formats and reporting procedures will be discussed in the future

eSPIRS data model – Inspire Identifier

- > External unique Identifier for INSPIRE spatial objects
- Reference valid outside the scope of Seveso can be used to link EURegistry
- Unique within the INSPIRE domain
- Consists in a Namespace and a LocalId
- Stable

eSPIRS data model – Thematic Identifier

Information on Establishment

CID 2014 /895/EU	CID 2022/1979	
	4.1 InspireId localId	
	4.1 InspireId namespace	
	4.2 ThematicId Identifier

eSPIRS data model – Thematic Identifier

- > Similar to INSPIREId
- > Only works within the scope of the Seveso reporting
- > Unique within the Seveso reporting
- Consists in a IdentifierScheme and an Identifier
- Persistent in the Seveso reporting
- Can be used to store a national identifier such as personalized identifier
