

2nd webinar | 19th May 2025

Reporting on Directive 2019/904 on the reduction of the impact of certain plastic products on the environment

2025 reporting process

**European
Environment
Agency**

Some housekeeping guidance for online participants.....

English

Don't worry about your **English!** This is a safe space and most of us are non-native speakers 😊

Recording

The workshop is being **recorded** for internal purposes only

This is dialogue

Raise your hand if you wish to speak.
We will **open the floor** for question **after each section**.
Use the **chat** to share materials or for specific comments that are not intended for discussion

Your name in TEAMS

In chat messages, **please type your name first, if it isn't clear who you are.**

Keep your camera on

We would love to see and interact with you! Please keep your **camera on**, and the **microphone mute** unless you want to speak

Technical difficulties? Send a message through the chat, or email to joao.costa@eea.europa.eu AND beatriz.vidal@eea.europa.eu

Agenda

- 1 Welcome and objectives of the webinar**
- 2 Reporting templates and updated manual for reporters**
- 3 Q&A and break**
- 4 Reporting process and infrastructure**
- 5 Planning, Commission updates and AOB**

Agenda

1 Welcome and objectives of the webinar

2 **Reporting templates and updated manual for reporters**

3 Q&A and break

4 Reporting process and infrastructure

5 Timeline, planning and AOB

Reporting templates: revised templates for items already reported

Template (a) and (b)

Implementing Decision (EU) 2022/162. Annex II. Format for reporting of data on single-use plastic products placed on the market							
Country	Year	Item	Placed on the market				
			Weight of plastic (tonnes) (1)	Weight of plastic (tonnes) adjusted for movements (2)	Total weight (tonnes) (3)	Total weight (tonnes - EU) adjusted for movements (2)	Products (thousand units) (4) Products (thousand units) adjusted for movements (5)
(<i>Not selected</i>)	2023	Cups for beverages, excluding their covers or lids.					
(<i>Not selected</i>)	2023	Made wholly of plastic A single component made wholly of plastic, i.e. thermoplastic such as biodegradable, used as bowls, with or without a cover, used to contain food which is intended for immediate consumption, either on-the-spot or take-away. It is typically consumed from the marketplace, and it is ready to be consumed without any further preparation.					
(<i>Not selected</i>)	2023	Cups for beverages, excluding their covers or lids.					
(<i>Not selected</i>)	2023	Made partly of plastic A single component made partly of plastic, i.e. thermoplastic such as biodegradable, used as bowls, with or without a cover, used to contain food which is intended for immediate consumption, either on-the-spot or take-away. It is typically consumed from the marketplace, and it is ready to be consumed without any further preparation.					
(<i>Not selected</i>)	2023						

Template (c)

Implementing Decision (EU) 2021/752		
Annex II. FORMAT for the REPORTING OF DATA		
If your country reports based on the weight of single-use bottles placed on the market		
Country	Year	F format for reporting of data calculated based on the methodology set out in Article 3 Table 1: Weight of single-use bottles in tonnes calculated in accordance with (a) in Annex I
< Not selected >	2023	Weight of single-use bottles placed on the market (single-use)
Adjustment of the weight of single-use bottles calculated in accordance with Article 3, paragraph 2		
< Not selected >	2023	Weight of single-use bottles placed on the market that have been imported from outside the EU by operators (SR=none)
< Not selected >	2023	Weight of single-use bottles placed on the market that have been received from other Member States by operators (SR=none)
< Not selected >	2023	Weight of single-use bottles placed on the market that have been exported (out of the EU) by operators (SR=none)
< Not selected >	2023	Weight of single-use bottles placed on the market that have been imported from Member States by operators (SR=none) (see row SR=NA)
< Not selected >	2023	Estimated weight of single-use bottles placed on the market that has been exported (out of the EU) by natural persons for their own personal use (SR=none answered)
< Not selected >	2023	Estimated weight of single-use bottles placed on the market that has been imported from outside the EU by natural persons for their own personal use (SR=none answered)
< Not selected >	2023	Estimated weight of single-use bottles placed on the market that has been moved to other Member State by natural persons for their own personal use (SR=none answered) (SR=NA answered)
< Not selected >	2023	Estimated weight of single-use bottles placed on the market that has been moved from other Member State by natural persons for their own personal use (SR=none answered) (SR=NA answered)
< Not selected >	2023	Weight of single-use bottles placed on the market adjusted (SR=NA)
		Not required
If your country reports based on the weight of waste generated		
Country	Year	Weight of single-use bottles placed on the market determined on the basis of the weight of waste generated from such products calculated in accordance with Art. 6 paragraph 3 in Annex I
< Not selected >	2023	Weight of waste single-use bottles collected separately by recycling in accordance with the requirements set out in Article 2(9)(a) and (b) (SR=none)
< Not selected >	2023	Weight of waste single-use bottles collected separately in accordance with the requirements set out in Article 2(9)(a) and (b) (SR=none)
< Not selected >	2023	Weight of waste single-use bottles collected by incineration in accordance with the requirements set out in Article 2(9)(a) and (b) (SR=none)
< Not selected >	2023	Weight of littered waste single-use bottles collected by municipal waste (SR=NA)

Template (d)

Annex 1.A. Formset for the reporting of data on fishing gear containing plastic PLACED ON THE MARKET

This is to be reported in weight (tonne) – the quality check report must specify whether corrective factors have been used (p.p. from volume to weight)

COUNTRY:		PLACED ON THE MARKET
REFERENCE YEAR:		2021

(tonnes)

Country	Year	Total
(Not selected)	2021	0.00

PLASTIC AND NON-PLASTIC (IN FISHING GEAR CONTAINING PLASTIC)

Total fishing gear (tonnes)	Non plastic parts of gear (t)	Plastic parts of gear (t)	Weight, floating gear (t)
1.00 (0.00)	0.00	0.00	0.00

(tonnes)

Country	Year	Plastics total
(Not selected)	2021	0.00
(Not selected)	2021	Polymers (PE)
(Not selected)	2021	Polymers (PP)
(Not selected)	2021	High density polyethylene (HDPE)
(Not selected)	2021	Alum
(Not selected)	2021	Other (PVC, PVE, PVC, etc.)
(Not selected)	2021	Mix of polymer

PLASTIC (IN FISHING GEAR CONTAINING PLASTIC)

Total plastic in fishing gear containing plastic and its components (tonnes)	Net plastic made in this sector (tonnes)	Other plastic parts of gear imported (tonnes)	Weight, floating gear (t)
0.00	0.00	0.00	0.00

(tonnes)

Country	Year	Metallic total
(Not selected)	2021	0.00
(Not selected)	2021	Steel
(Not selected)	2021	Aluminum
(Not selected)	2021	Lead
(Not selected)	2021	Other metal or mixed metal

METALS (IN FISHING GEAR CONTAINING PLASTIC)

Total metal in fishing gear containing plastic and its components (tonnes)	Non plastic parts of gear (t)	Weight, floating gear (t)
0.00	0.00	0.00

(tonnes)

Country	Year	Rubber total
(Not selected)	2021	0.00

RUBBER (IN FISHING GEAR CONTAINING PLASTIC)

Total rubber in fishing gear containing plastic and its components (tonnes)	Non-plastic parts of gear (t)	Weight, floating gear (t)
0.00	0.00	0.00

Implementing Decision (EU) 2023/2683

Annex II. FORMAT FOR THE REPORTING OF DATA

COUNTRY:

< Please select >

REFERENCE YEAR:

2023

Please specify here below if you are providing data for either columns C1 ("PET bottles") and C2 ("Beverage bottles other than PET bottles"), or columns C1 and C3 (total of "Beverage bottles", which equals C1 + C2).

REPORTING BASED ON:

< Please select >

1. Format for reporting of data calculated based on the methodology set out in Article 3

Table 1

Weight of plastic used in beverage bottles and of PET bottles placed on the market calculated in accordance with 'Article 3 (in tonnes)

Country	Year		PET bottles (C1)	Beverage bottles other than PET bottles (C2)	Beverage bottles (C3 = C1 + C2)
< Not selected >	2023	Weight of plastic used in bottles manufactured and placed on the market in the Member State (W_MS)			
Adjustment of the weight of plastic used in bottles calculated in accordance with Article 3, paragraph 2					
< Not selected >	2023	Weight of plastic used in bottles moved from other Member States and placed on the market (W_in from other MS)			
< Not selected >	2023	Weight of plastic used in bottles that have been imported and placed on the market (W_imported)			
< Not selected >	2023	Weight of plastic used in bottles moved to other Member States after having been placed on the market in the Member State (W_out to other MS)			
< Not selected >	2023	Weight of plastic used in bottles that have been exported after having been placed on the market in the Member State (W_exported)			
< Not selected >	2023	Weight of plastic used in bottles placed on the market adjusted (W)	No adjustment	No adjustment	No adjustment

Template (f): Post consumption waste from filters for tobacco products

Legend

Light colour means voluntary field

Dark colour means compulsory - see provisions that apply in specific cells

Implementing Decision (EU) 2021/2267

Annex I. Format for reporting data

COUNTRY:

< Please select >

REFERENCE YEAR:

2023

FORMAT FOR REPORTING DATA

Format for reporting on post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904

Country	Year		Total (tonnes)	Collected as Litter (tonnes)	Collected through public waste (tonnes)
< Not selected >	2023	Weight of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904.			

→ Please inform us about any issue you spot when using the templates

(a)&(b): Amounts placed on market and consumption reduction measures CfB and FC

Implementing Decision (EU) 2022/1482
Annex B: Format for reporting of data on single-use plastic products placed on the market

Country	Year	Item	Placed on the market					
			Weight of plastic (tonnes) (1)	Weight of plastic (tonnes) adjusted for movements (2)	Total weight (tonnes) (3)	Total weight (tonnes) - (2) adjusted for movements (4)	Products (thousand units) (5)	Products (thousand units) adjusted for movements (6)
< Not selected >	2023	Cups for beverages, including their covers and lids a new consumable, made wholly of plastic, i.e. receptacle such as bottle, with or without a cover, used to contain food which is intended for immediate consumption, either on-the-spot or take-away, fill in separately consumed from the receptacle, and fill in ready to be consumed						
< Not selected >	2023	Made wholly of plastic						
< Not selected >	2023	Cups for beverages, including their covers and lids a new consumable, made partly of plastic, i.e. receptacle such as bottle, with or without a cover, used to contain food which is intended for immediate consumption, either on-the-spot or take-away, fill in separately consumed from the receptacle, and fill in ready to be consumed						
< Not selected >	2023	Made partly of plastic						

“QC3”: Need to specify the data source when indicating “Other”

3. Description of methods used				
a. Data sources for calculating data on single-use plastic cups for beverages, including their covers and lids, referred to in Part A, point (1), of the Annex to Directive (EU) 2019/904 placed on the market of a Member State				
Country	Year	Data sources	Data source used (yes/no)	Share in the total data (%)
< Not selected >	2023	Data from deposit refund schemes	< Please select >	
< Not selected >	2023	Extended Producer Responsibility (EPR) scheme data. Data from producers or from organisations implementing EPR obligations on their behalf	< Please select >	
< Not selected >	2023	Data from central registries on single-use plastic cups for beverages placed on the market	< Please select >	
< Not selected >	2023	Data from municipalities	< Please select >	
< Not selected >	2023	Surveys [Fill in details in section 4c within worksheet "QC4"]	< Please select >	
< Not selected >	2023	Compositional analyses	< Please select >	
< Not selected >	2023	Electronic registry	< Please select >	
< Not selected >	2023	Administrative reporting	< Please select >	
< Not selected >	2023	Production statistics - national codes	< Please select >	
< Not selected >	2023	Tax statistics	< Please select >	
< Not selected >	2023	Industry statistics	< Please select >	
< Not selected >	2023	Other sources (specify)	Yes	
< Not selected >	2023	Other sources (specify)	< Please select >	
< Not selected >	2023	Other sources (specify)	< Please select >	
< Not selected >	2023	Other sources (specify)	< Please select >	

(a)&(b): Amounts placed on market and consumption reduction measures CfB and FC

Country	Year	Item	Placed on the market					
			Weight of plastic (tonnes) (1)	Weight of plastic (tonnes)- adjusted for movements (2)	Total weight (tonnes) (3)	Total weight (tonnes)- (3)- adjusted for movements (4)	Products (thousand units) (5)	Products (thousand units)- adjusted for movements (6)
Belgium	2023	Cups for beverages, including their covers and lids.	8038.00					
Belgium	2023	Food containers made wholly of plastic, i.e. receptacles such as boxes, with or without a cover, used to contain food which is intended for immediate consumption, either on-the-spot or take away, (B) is typically consumed from the receptacle, and (C) is ready to be consumed without any further preparation, such as cooking, heating or heating, including food containers used for fast food or other meal ready for immediate consumption, except beverage containers, plates and packets and wrappers containing food.	20000.00					
Belgium	2023	Cups for beverages, including their covers and lids.	400.00		8038.00			
Belgium	2023	Food containers made partly of plastic, i.e. receptacles such as boxes, with or without a cover, used to contain food which is intended for immediate consumption, either on-the-spot or take away, (B) is typically consumed from the receptacle, and (C) is ready to be consumed without any further preparation, such as cooking, heating or heating, including food containers used for fast food or other meal ready for immediate consumption, except beverage containers, plates and packets and wrappers containing food.	100.00		2000.00			

“QC4”: Addition of tables to report changes from 2024 (2022) reporting

		d. Differences from data reported for the previous years
Country	Year	Significant methodological changes in the calculation method used for the current reference year in relation to the calculation method used for previous reference years, if any (please include in particular retrospective revisions, their nature and whether a break-flag is required for a certain year).
< Not selected >	2023	
< Not selected >	2023	
< Not selected >	2023	
< Not selected >	2023	

e. Where the weight of plastic contained in and the total weight of single-use plastic products placed on the market of a Member State or the number of such products placed on the market of a Member State has increased by more than 10 % compared to the previous reporting year, an explanation of the reasons for that differences							
Country	Year	Metric	Reporting based on	Reported value 2022	Reported value 2023	Variation (%)	Main reason for the variation
Belgium	2023	Cups for beverages wholly made of plastic	Weight of plastic	8038	8500	6%	
Belgium	2023	Food containers wholly made of plastic	Weight of plastic	12262	20000	63%	
Belgium	2023	Cups for beverages partly made of plastic	Weight of plastic	373	400	7%	
Belgium	2023		Total weight	3520	4000	14%	
Belgium	2023	Food containers partly made of plastic	Weight of plastic	140	150	7%	
Belgium	2023		Total weight	1961	2000	2%	

(c): Separate collection of SUP beverage bottles

“SUP bottles-PoM” (based on the weight of waste): Warning in cell E29 when it does not match the sum of the values of separate collection on the separate collection tab

INDICATE HERE IF REPORT BASED ON THE WEIGHT OF SUP BOTTLES PoM OR ON THE WEIGHT OF WASTE GENERATED FROM

COUNTRY:

< Please select >

REFERENCE YEAR:

2023

Please specify if you are reporting based on the default approach, i.e. weight of single-use bottles placed on the market, or based on the weight of waste generated from such products.

REPORTING BASED ON:

Weight of waste generated

If your country reports based on the weight of single-use bottles placed on the market

Country	Year	I. Format for reporting of data calculated based on the methodology set out in Article 3 Table 1: Weight of single-use bottles in tonnes calculated in accordance with Article 3 (in tonnes)
< Not selected >	2023	Weight of single use bottles placed on the market ($W_{BPM, year}$)
		Adjustment of the weight of single-use bottles calculated in accordance with Article 3, paragraph 2
< Not selected >	2023	Weight of single use bottles placed on the market that have been imported (from outside the EU) by operators ($W_{B in imported}$)
< Not selected >	2023	Weight of single use bottles placed on the market that have been received from other Member States by operators ($W_{B in from other MS}$)
< Not selected >	2023	Weight of single use bottles placed on the market that have been exported (out of the EU) by operators ($W_{B out ops}$)
< Not selected >	2023	Weight of single use bottles placed on the market that have been moved to other Member States by operators ($W_{B out moved to other MS}$)
< Not selected >	2023	Estimated weight of single use bottles placed on the market that have been exported (out of the EU) by natural persons for their own personal use ($W_{B out by natural persons}$)
< Not selected >	2023	Estimated weight of single use bottles placed on the market that have been imported (from outside the EU) by natural persons for their own personal use ($W_{B in by natural persons}$)
< Not selected >	2023	Estimated weight of single use bottles placed on the market that have been moved to other Member States by natural persons ($W_{B in moved to other MS}$)
< Not selected >	2023	Estimated weight of single use bottles placed on the market that have been received from other Member States by natural persons ($W_{B in from other MS}$)
< Not selected >	2023	Weight of single use bottles placed on the market that have been received from other Member States by natural persons ($W_{B in from other MS}$)

If your country reports based on the weight of waste generated from such products calculated

Country	Year	II. Format for reporting of data calculated based on the methodology set out in Article 2(4) Table 2: Weight of separately collected for recycling waste single-use bottles calculated in accordance with Article 2(4) (in tonnes)
< Not selected >	2023	Weight of waste single-use bottles collected separately for recycling in accordance with the requirements set out in Article 2(4)(a) and (b) (W_{wsc})

Annex II. FORMAT FOR THE REPORTING OF DATA

COUNTRY:

< Please select >

REFERENCE YEAR:

2023

Please specify here below if you are providing data for either columns C1 ("PET bottles") and C2 ("Beverage bottles other than PET bottles"), or columns C1 and C3 (total of "Beverage bottles", which equals C1 + C2).

REPORTING BASED ON:

< Please select >

1. Format for reporting of data calculated based on the methodology set out in Article 3

Table 1

Weight of plastic used in beverage bottles and of PET bottles placed on the market calculated in accordance with 'Article 3 (in tonnes)

Country	Year		PET bottles (C1)	Beverage bottles other than PET bottles (C2)	Beverage bottles (C3 = C1 + C2)
< Not selected >	2023	Weight of plastic used in bottles manufactured and placed on the market in the Member State (W_MS)			
Adjustment of the weight of plastic used in bottles calculated in accordance with Article 3, paragraph 2					
< Not selected >	2023	Weight of plastic used in bottles moved from other Member States and placed on the market (W_in from other MS)			
< Not selected >	2023	Weight of plastic used in bottles that have been imported and placed on the market (W_imported)			
< Not selected >	2023	Weight of plastic used in bottles moved to other Member States after having been placed on the market in the Member State (W_out to other MS)			
< Not selected >	2023	Weight of plastic used in bottles that have been exported after having been placed on the market in the Member State (W_exported)			
< Not selected >	2023	Weight of plastic used in bottles placed on the market adjusted (W)	No adjustment	No adjustment	No adjustment

Implementing Decision (EU) 2021/2267
Annex I. Format for reporting data

COUNTRY:

< Please select >

REFERENCE YEAR:

2023

FORMAT FOR REPORTING DATA

Format for reporting on post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904

Country	Year		Total (tonnes)	Collected as Litter (tonnes)	Collected through public waste (tonnes)
< Not selected >	2023	Weight of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904.			

- Similar structure: data reporting and quality check report
- “Waste tobacco products collect.”: Addition of two separate columns to allow reporting the breakdown (collected as litter and collected through public waste)

Manual for reporters – guidance by reporting template, item (f)

Background for
the reporting of
the item

Scope of reporting

[SUP Directive](#)

Article 13 (1)

(f) Data on the post-consumption waste of single-use plastic products listed in Section III of Part E of the Annex that has been collected in accordance with Article 8(3).

'tobacco products' (as in Article 3 of the SUP Directive) means tobacco products as defined in point (4) of Article 2 of Directive 2014/40/EU: ['tobacco products' means products that can be consumed and consist, even partly, of tobacco, whether genetically modified or not].

Article 13 (2)

The data and information reported by Member States in accordance with this Article shall be accompanied by a **quality check report**. The data and information shall be reported in the format established by the Commission.

Methodological considerations

[SUP Directive](#)

Article 8 (3) [Obligations on Extended Producer Responsibility for item f, among other]

[Commission Implementing Decision \(EU\) 2021/2267](#)

Recital 2 [Products collected through public waste collection systems and litter clean-up activities; all reported on the basis of weight; considerations on the quality check report]

See dedicated **Frequently Asked Questions** at: [reporting of item f](#)

Guidance to fill in
the reporting
template

Excel sheets for reporting within the template

Name	Description																						
Waste tobacco products collect.	Description: Data on the weight of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems, as detailed in Annex I of the Commission Implementing Decision (EU) 2021/2267.																						
	Guidance to fill in the sheet: In row 13 , you will see colored dark green the mandatory field where you are asked to report the total weight (in tonnes) of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904.																						
	<table><tr><th colspan="5">FORMAT FOR REPORTING DATA</th></tr><tr><th colspan="5">Format for reporting on post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904</th></tr><tr><th>Country</th><th>Year</th><th></th><th>Total (tonnes)</th><th>Collected as Litter</th><th>Collected through public waste</th></tr><tr><td>< Not selected ></td><td>2023</td><td>Weight of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904.</td><td></td><td></td><td></td></tr></table>	FORMAT FOR REPORTING DATA					Format for reporting on post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904					Country	Year		Total (tonnes)	Collected as Litter	Collected through public waste	< Not selected >	2023	Weight of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904.			
FORMAT FOR REPORTING DATA																							
Format for reporting on post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904																							
Country	Year		Total (tonnes)	Collected as Litter	Collected through public waste																		
< Not selected >	2023	Weight of post-consumption waste of tobacco products with filters and filters marketed for use in combination with tobacco products collected as litter and through public waste collection systems in accordance with Article 13(1), point (f) of Directive (EU) 2019/904.																					
	<p>On a voluntary basis, you may provide data for the breakdown of post-consumption waste of tobacco products with filters and filters between collected as litter and collected through public waste.</p> <p>The cells for reporting have been formatted as numbers with two decimals. Please be as accurate as possible and note that if you report small values, Excel will display a value rounded to two decimals. For instance, if you report 3.321 tonnes, you will see the rounded value (3.32). However, the complete value will be there in the cell. The reporting unit is tonnes.</p>																						

Manual for reporters – revised Q&A, filling in the reporting templates

Q: Can I use as a proxy for 2023 data, the data that I could obtain from the EPR systems setup in 2025?

A: Some countries expect obtaining more accurate data from the EPR system recently set up following the provision of the SUP Directive. While increase accuracy is very valuable, using data covering the reference period 2025 to report for previous years is not appropriate as this will not allow to monitor consumption reduction over these years.

It is therefore expected that countries report the 2023-data this year that are available, as accurate as possible and report the data covering 2025 for the 2027-reporting cycle. If your knowledge of the 2025-data raises doubts on the accuracy of the 2023-data, you may indicate this in the quality check report already now (but surely in the quality check report in the 2027-reporting cycle as a change of methodology for the 2025-data compared to previous years).

Q: Can I report data using a different data source or methodology?

A: Yes. Since this will be the second-year reporting, we have incorporated to reporting templates ab, c and d the tables of the reporting format of the Quality Check Report that are meant to report any relevant change in the reporting methodology. There, for items a and c, you will also have to explain the reasons for the variation of the reported values, if it is greater than 10% compared to the data reported last year. The templates will automatically calculate for you this variation.

Manual for reporters – revised Q&A, items (a) & (b)

Q: Can I change the metric in which I will report this year, as compared to the previous year, i.e. from weight to number of products or vice versa?

A: As indicated in the reporting templates last year, countries were asked to keep in mind that the choice made for the first reporting year will have to be maintained for subsequent reporting years, i.e. it will not be possible to switch between reporting based on weight and based on number. Therefore, this year you should report based on the option that was actively chosen in the dedicated cells of the tab 'CfB&FC-PoM'.

Manual for reporters – revised Q&A, item (e)

Q: Based on the same survey, the number of replies I received for the data on plastic weight was much higher than the number of replies for the recycled plastic content. How can I ensure a robust calculation of the recycled content (in percent), which considers both metrics?

A: The proportion of recycled plastic content in bottles, expressed in percent (RC as in Annex I, formula 1) is automatically calculated by the reporting templates, based on the values reported in both data tabs ('SUP bottles - Plastic weight ' and 'SUP bottles- Recycled content'). This is done in the sheet 'SUP bottles- Recycled content', in row 16 for values not adjusted, and in row 23 for adjusted values. If the coverage of the data differs between the data on plastic weight on one hand, and the data on recycled plastic, on the other hand, this needs to be included as a factor affecting the accuracy of the data. This is to be done in Table 4.3 within sheet QC4, where you can specify this as a coverage error, and indicate whether this is supposed to underestimate or overestimate the resulting proportion of recycled plastic content.

Updates from the European Commission

→ FAMENET study on EMFAF support for marine litter collection

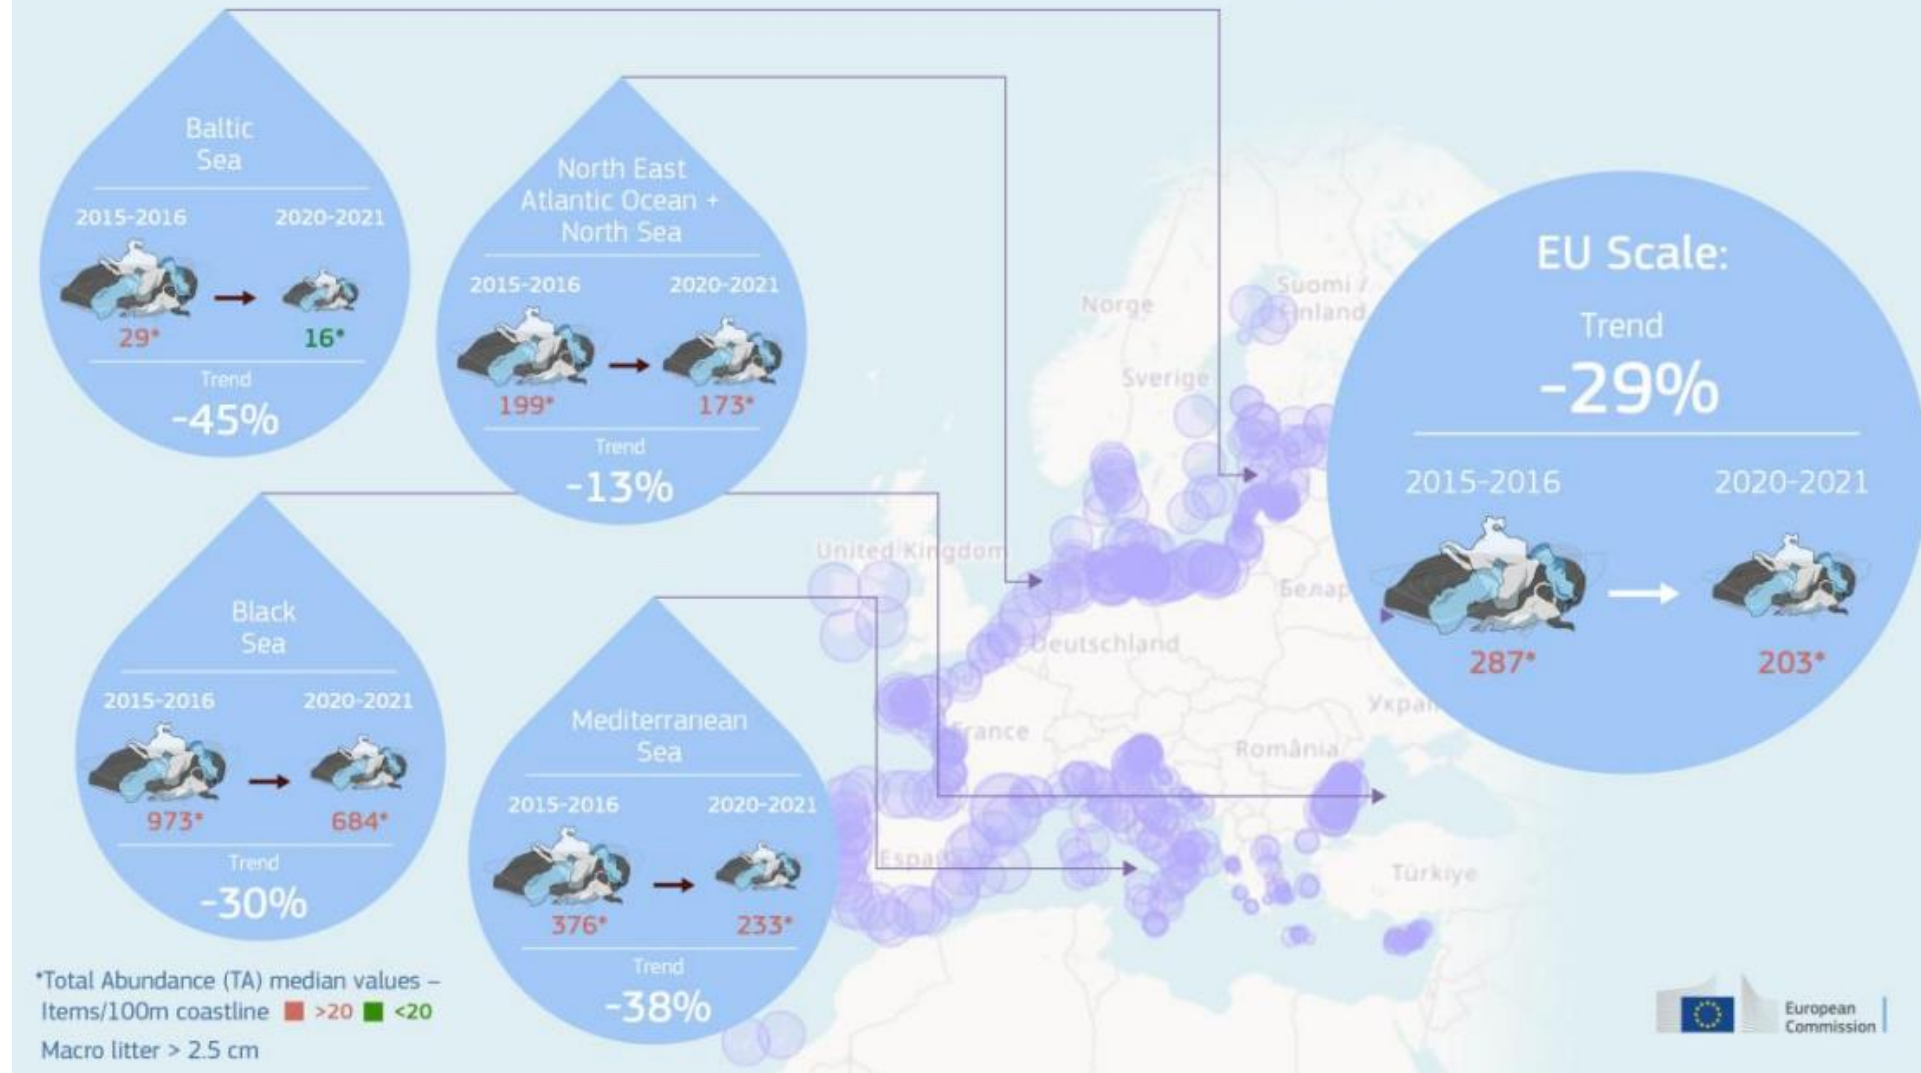

Evaluation of the SUP Directive

Study
launched in
mid-2025

COM will evaluate SUPD by 3 July 2027 and if appropriate, review:

- all the other measures listed in the SUPD
- annex listing SUP products
- binding quantitative EU targets (consumption reduction for food containers and beverage cups and collection rates for fishing gear)
- change in materials used in the SUP products
- criteria or a standard for biodegradability in the marine environment
- binding measures for the reduction of filters

Marine Macro Litter on EU Coastlines

SUP reduced by **40 %**
on the EU coastlines!
